ABOUT ME

I originally enlisted in the US Army Security Agency which was a "subordinate" of the National Security Agency (NSA). I served in that capacity for approximately four years in three different locations. This is a record of my assignments for those that "dispute" my service and try to "debunk" my background and information.

Assignment 1 -- After my initial training I was assigned to the 79th SOU (Special Operations Unit), Shemya Island, Alaska. My primary MOS was 71L which is an Administration Specialist, my secondary MOS was 98J (non morse intercept). As an Administration Specialist I controlled and maintained access to all classified material. I reported to a 1st Lt. who reported to a NSA representative (GS-15). This was an 11 month assignment.

Assignment 2 -- After a 1 month leave I travelled to Japan for my next assignment which was at the 14th USASA Field Station in southern Japan. I reported to and worked directly for two NSA representatives (GS15 and GS16). I prepared reports for them, collected intelligence from several sources, controlled and maintained classified material. This was a two year assignment.

Assignment 3 -- My final months of service was spent at Arlington Hall Station, Arlington, Virginia which was the headquarters for the Army Security Agency and the Defense Intelligence Agency (DIA). I finished my service there and was processed out of the military at Fort Myers, Virginia.

Fairfax County Police, Fairfax, Virginia -- I worked as a police officer for a little more than a year which is located in Northern Virginia near Washington DC after my separation from the US military.

Michigan State Police -- I worked as a state trooper and criminal investigator for a period of eight years in the Detroit, Michigan area.

US Military, contractor, teacher -- I worked for approximately 12 years as a contractor for the US military on various projects. In between contracts I also worked as a teacher for a college in Texas, high school and adult education teacher in Oklahoma.

Peoples Republic of China -- From 2002-2007 I worked for several schools in Northern China near the North Korean border (south and north of Shenyang and in Yanji) as a English and Computer teacher. During these times I spoke with several people concerning American POWs seen as recently as 2005 working near labor camps in the fields. I will provide more details located on the "Journal" page.

The reason I have provided more information concerning my background is to dispute some claims I never worked for the NSA, served in the military, travelled to China or just repeated what is on the internet. All I have to say I took a risk of going to Northern China and gathering this information at my own expense. I did not see any of these persons there and most of them have never travelled outside of their "comfortable" domains or would ever do so. They are just "talkers" who deny reality and do not want to face the truth. This is mainly intended for various news media and US government sources. If anyone is in doubt please go to Northern China and dare to live and stare across the border into North Korea. Be followed everyday by Chinese and North Korean agents as I did. I can tell you how to arrange your flight, obtain your Chinese visa and if you wish I can contact a school so you will have income and a place to live while you teach English there. My purpose was not just to collect information concerning POWs. It was two fold. I am also a teacher and my other objective is to only educate people so they can provide a better life for themselves and their families. It is a truly rewarding occupation and experience.

Best Wishes,

Chen
